PROFESSIONAL SUMMARY

Junior Full-Stack Developer specializing in React and ASP.NET Core, with hands-on experience building production-style web applications using relational databases, REST APIs, and Docker. Strong foundation in clean architecture, CRUD systems, and real-world team-based software projects. Actively seeking a graduate or junior developer role.

EDUCATION

WeThinkCode

National Diploma in Software Engineering (NQF Level 6)

- Coursework completed in December 2025; formal graduation expected in 2026.

Gauteng, Rosebank

Sep 2024 – Dec 2025

TECHNICAL EXPERIENCE

Technical Mentor (Part-Time)

Sep 2025 – Dec 2025

WeThinkCode

Gauteng, Rosebank

- Mentored first-year developers in Java, Git, debugging, and object-oriented programming fundamentals.
- Reviewed student codebases, identified logical and structural issues, and provided actionable feedback aligned with clean code principles.
- Assisted students with debugging, problem decomposition, and understanding system behavior during project development.
- Encouraged collaborative development practices including version control workflows and peer code reviews.

PROJECTS

Inventory Management System | React, ASP.NET Core, PostgreSQL, Docker

Jun 2025 – Aug 2025

- Built a full-stack inventory management system enabling businesses to track products, stock levels, and inventory valuation.
- Designed and implemented RESTful APIs using ASP.NET Core with secure CRUD operations and relational data modeling in PostgreSQL.
- Implemented weighted-average cost calculations and closing stock logic to reflect real-world inventory accounting rules.
- Containerized the backend using Docker to ensure consistent development and deployment environments.

QuizForge AWS | React, Gemini API

Apr 2025 – May 2025

- Developed a web-based quiz platform focused on teaching cloud computing fundamentals to beginner and intermediate learners.
- Integrated the Gemini API to dynamically generate quiz questions based on selected topics.
- Implemented quiz scoring, result summaries, and feedback to support effective self-assessment.
- Designed a clean and engaging user interface to improve user experience and retention.

TECHNICAL SKILLS

Languages: C#, TypeScript, SQL (PostgreSQL), Java, Python

Frontend: React, Tailwind CSS, HTML, CSS

Backend: ASP.NET Core, RESTful API development

Databases: PostgreSQL, relational data modeling

Tools & Platforms: Git, GitHub, Docker, VS Code, Visual Studio, IntelliJ

Concepts: CRUD operations, API design, clean architecture, debugging, version control
